**CRITERION 2
COUNTY MENTAL HEALTH SYSTEM
UPDATED ASSESSMENT OF SERVICE NEEDS**

Criterion II
Question #IV

MHSA Community Services and Supports (CSS) population assessment and service needs

B. Colusa County has a large Hispanic population and the employment rate for these individuals is very high. The lack of experience and low education does not give these client much option. We have in place the One-Stop where people can go and increase their knowledge base, but because of the stigma involved people are afraid and embarrassed. Many times these individuals are embarrassed because they have not mastered the English language and are afraid of ridicule.

Criterion #2

V. Prevention and Early Intervention (PEI) Plan: The process used to identify the PEI priority populations.

Colusa County continuously strives to improve access to mental health services for its underserved communities. These communities are the Hispanic/Latino population, Native Americans and Foster Care Youth. Every plan that is written in Colusa County includes this population as a target and strategies are put in place to effectively reduce racial/ethnic service disparities. Through our PEI Planning funding we worked with the local One-Stop to provide specific outreach to the Hispanic/Latinos via a One-Stop Hispanic/Latino staff member. We have continued to use this staff person through the One-Stop to do implementation updates, progress reporting and additional planning. Via the Native American Collaboration we were able to effectively bring the original number of 4 native American's in 2005-2006 to over 45 per month currently. The Foster Care youth are written into our plans as being eligible to receive services regardless of other criteria that are used in our youth specific programs. We also serve those Transitional Age Youth (TAY) ages 19-21. Services are delivered in a culturally and linguistically competent manner our client population as well as staffing, reflect the county population. We work to reduce disparities through outreach and engagement via staff that are able to provide bilingual and bicultural services to engage the diverse community and assist individuals in assessing our services.

CRITERION 3
COUNTY MENTAL HEALTH SYSTEM
STRATEGIES AND EFFORTS FOR REDUCING
RACIAL, ETHNIC, CULTURAL, AND LINGUISTIC
MENTAL HEALTH DISPARITIES

I. List the target populations with disparities your county identified in Medi-Cal and all MHSA components (CSS, WET, and PEI).

a) Our target population consist of children from 0 -5 that have been identified by their parents/caregivers.

b) Children at school age ranging from 6 – 18 years old

c). Young Adults or the Transitional Age Youth (TAY) 19 – 21 years old

d) Adults ranging in age from 22 – 99

The processes used to identify the disparities are the referrals receive from:

a) Referrals from the local Sheriff and Police Departments

b) The school principle, teachers or school counselors

c) Parents

d) Any concerned county resident

II. The main disparities we found in Colusa County were the lack of resources and education. The county is spread out over 2000 square miles. The land has been used primarily for agriculture, but new homes and neighborhoods are developing rapidly. The poverty levels are very high and the unemployment level about 27% as of 2010.

III. One of the ways we found to reduce disparities was to engage in a great deal of outreach so that we can capture those individuals that are hampered by a language barrier or those that require transportation because they live so far from the local mental health office.

IV. The County of Colusa has in place a system that allows us to review the data that is gathered on a monthly basis to insure the what we are doing to reach out to the community is working. We have developed the Direct Schools program to engage those students that have been identified with having major behavioral issues at home and at school. We have the Wraparound program that assists children and families. We have the Native American Collaboration that assists those Native American Children and their families by providing an array of mental health services from medication management to individual therapy sessions. And we have the Adult and Children's Systems of Care that have implemented the Full Service Partnership slots and have managed to provide a full array of "whatever it takes" services.

V. From 09/10 – 10/11 services have increased to African Americans increased to 33%, services to Mexicans/Mexican Americans increased to 32% and increased children services to 31%. We also had an increase in our certified bilingual speaking staff.
